BED INFORMATION

As of June 2011

SIZES

STANDARD BEDS AND 'KIT BED +'

Timber width: 45mm

Small single height: 130cm x 90cm x 20cm

Small double height: 130cm x 90cm x 40cm

Medium single height: 175cm x 125cm x 20cm

Medium double height: 175cm x 125cm x 40cm

Large single height: 250cm x 147cm x 20cm

Large double height: 250cm x 147cm x 40cm

Our standard kit beds come ready drilled, with the corner brackets in place. All you need to do is slot the timbers together, and add the final screws to the brackets. Tools needed: Phillips Screwdriver.

Our 'Kit Bed +' beds come as above but with the corner aluminium channels for the frames already fitted. You will need to screw in the middle channels for medium and large beds. Tools needed: Phillips Screwdriver; 10ml spanner.

PREMIUM KIT BEDS

Timber width: 75mm

Large only.

Large single height: 250cm x 142cm x 22.5cm

Large double height: 250cm x 142cm x 45cm

These kit beds come ready drilled and are supplied with all corner brackets, fixings and screws etc. They are simple to assemble. Tools needed: Phillips Screwdriver; 10ml spanner

MATERIALS

All timber used is PEFC certified. All pine is treated with ProTim – a water based anti-insecticide and anti-fungicide, for longevity. No arsenic based preservatives are used, making the beds completely safe for growing food. **All of our products**

are made here in Norfolk, either by us or by local businesses.

Our pine beds should last 12-15 years under normal conditions. Our oak beds should last for at least 20 years under normal conditions.

Our covers will last a good four or five years, and much longer in many instances, if they are treated with due care. We cannot be held responsible for damage due to heavy tugging on them, or if they have been left out in heavy snow etc.

All our metal work is either stainless steel or aluminium. This means that it is non-rusting. Our frames should be a one-time only purchase if treated with reasonable care.

INSTALLED SLEEPER BEDS

If you are looking for a more traditional 'sleeper' bed, we offer a service installing raised beds using reclaimed, untreated hardwood sleepers. These beds are built with a pathway of gravel or bark surrounding them, and are designed to be used with our premium sectional frames. Our range of covers will fit these installed beds. These beds look beautiful and will last a lifetime.

Prices start from £599. This includes all our labour; filling the bed with screened topsoil and compost; all materials. This does not include frames or covers. Discounts are given for each additional bed on the same site.

BESPOKE BEDS, FRAMES AND COVERS

We are happy to build you a bed to your required dimensions, as we are aware that our range of standard sized beds is not suitable for all gardens. We can make them smaller, larger, wider, taller. We can also make our frames and our netting covers to most dimensions. Please give us a call if you'd like to discuss how we could help.
